EXPERIENCE

Full Stack Developer

Eli Lilly (ACL Digital Payroll)

January 2025 - Present, Bengaluru , India

- Architected and developed 2 full-stack projects from scratch to MVP as one of the two Full-Stack Developers in the team.
- Engineered ETL glue jobs to ingest data from source PostgreSQL DB to DynamoDB, streamlining data ingestion processes.
- Developed RESTful APIs in Python using AWS Lambda to implement core business logic and application functionality.
- Built responsive frontend applications in React.js based on Figma design specifications.
- Designed and modeled database schemas to optimize data structure and application performance.
- Delivered solutions that saved the company hundreds of thousands of dollars in training costs and eliminated technical debt by modernizing the legacy tech stack.
- Accelerated feature delivery by leveraging agentic AI tools (Claude Code, OpenAI Codex, GitHub Copilot) for architecture planning, implementation, testing, and debugging.

Software Engineer

Genpact

July 2022 - December 2024, Bangalore

- Developed an Enterprise Planning and Budgeting System with React.js frontend and Python/AWS backend for Warner Bros Media, handling end-to-end application development for financial planning workflows
- Designed and implemented scalable data models and database schemas to support comprehensive business planning and financial forecasting requirements
- Created complex SQL queries and ETL pipelines for data cleaning and transformation, integrating multiple data sources into consolidated financial datasets
- Automated critical workflows using AWS EventBridge and Lambda functions for scheduled data processing, backup management, and financial data imports/exports
- Built interactive React.js dashboards with RESTful APIs using Python and AWS services (RDS, S3, Lambda) to visualize business planning data and enhance stakeholder engagement
- Deployed applications using AWS infrastructure and provided technical mentorship to interns on a MERN stack project ("NovaFit") covering Node.js, Express.js, React.js, and MongoDB
- Optimized system performance and implemented CI/CD pipelines to streamline financial data workflows and improve operational efficiency

Intern

IBM

January 2022 - June 2022, Bangalore

- Contributed to clinical data integration in **Horizon Blue Cross Blue Shield New Jersey** project serving millions of members by consolidating data from multiple healthcare vendors into a centralized AWS RDS PostgreSQL database.
- Developed Python-based AWS Glue ETL jobs to implement business logic and data validation rules, processing over 2 million healthcare records monthly.
- Optimized database performance through indexing strategies and query optimization, improving data processing speed by 40% for downstream analytics teams.

PROJECT

The Wild Oasis

the-wild-oasis-baba.netlify.app/login

- An internal hotel management app enabling users (hotel employees) to create, delete, and update cabins, check in and out guests, and access statistics such as bookings, stays, and occupancy rates.
- Developed as a fullstack project, the frontend is crafted with React.js and Styled Components, while the backend leverages Supabase for authorization, authentication, and data storage, facilitating API calls. React Query manages remote state, while Context API handles UI state. React Forms streamlines form management, with additional tools like Recharts and React Hot Toasts enhancing functionality. The project is hosted on Netlify, supporting CI/CD (continuous integration and continuous delivery/deployment) for seamless deployment.

Fast React Pizza Co.

<https://github.com/ManojMaheshPatil/Fast-React-Pizza>

- Fast React Pizza Co., a professionally crafted website offering an extensive pizza menu selection. The project used Advanced React, Redux, and Tailwind CSS to build a seamless ordering experience.

MyBlog

github.com/ManojMaheshPatil/blog-api-v1

- Developed a complete API for a blog with all the CRUD operations. Implemented all the backend features required for a blog to work. Used NodeJS as the programming language

EDUCATION

Bachelor of Technology

PES University · Bangalore · 2022 · 8.51

CERTIFICATIONS

The Ultimate React Course - React, Redux & More

Udemy · 2024

Master Node JS by building a real-world RESTful API

Udemy · 2023

Beginner Full Stack Web Development: HTML, CSS, React & Node

Udemy · 2022

SKILLS

Programming - Python, , JavaScript
Front End - React.JS , Tailwind CSS , HTML , CSS , Bootstrap , Context API , React Bootstrap , Styled Components.
Back End - Node.JS , FAST API , Amazon Web Services (AWS) , Firebase , Supabase , JSON .
Database & Tools - SQL , MongoDB , Oracle EPM , Oracle EDMCS, Git , Github , REST API , JIRA , SmartView, CI/CD.
