EXPERIENCE

Software Engineer

Genpact

July 2022 - Present, Bangalore

- Spearheaded the transition of Warner Bros Discovery's tech stack from legacy systems to modern platforms, utilizing Node.js, Express, and REST API to enhance performance and scalability. Worked closely with cross-functional teams, including frontend developers, QA, and project managers, to ensure smooth migration and successful deployment of new systems, enhancing Warner Bros Discovery's technological capabilities.
- Engineered and deployed RESTful APIs using Node.js and Express, ensuring seamless integration and communication between various components of the new tech stack.
- Analyzed and optimized system performance post-migration, reducing response times and improving overall system efficiency by 30% through strategic use of modern technologies.
- Lead a group of interns, offering guidance for an internship project "NovaFit" centred on the development of a gym subscription-based application built using MERN (MongoDB, Express.js, React.js and Node.js) stack.

Intern

IBM

January 2022 - June 2022, Bangalore

- Contributed to a team that led the clinical data integration for "Horizon Blue Cross Blue Shield New Jersey" client.
- Used Apache Nifi to automate data flow from various data vendors. Loaded the data into Hadoop distributed file system (HDFS). Wrote spark jobs in python to apply business rules on the data. Used Hive to run SQL-like queries to validate the data for downstream consumption.

SKILLS

Programming - Python

Front End - ReactJS, Redux, Tailwind CSS, HTML, CSS, Bootstrap, React Query, Context API, React Bootstrap, Styled Components.

Back End - NodeJS, Supabase, Firebase, Flask, JSON.

Database & Tools - Amazon Web Services (AWS), SQL, MongoDB, Oracle EPM, Oracle EPM, Git, REST API, JIRA, SmartView, CI/CD.

PROJECTS

The Wild Oasis

the-wild-oasis-baba.netlify.app/login • January 2023 - May 2024

- An internal hotel management app enabling users (hotel employees) to create, delete, and update cabins, check in and out guests, and access statistics such as bookings, stays, and occupancy rates.
- Developed as a fullstack project, the frontend is crafted with React.js and Styled Components, while the backend leverages Supabase for authorization, authentication, and data storage, facilitating API calls. React Query manages remote state, while Context API handles UI state. React Forms streamlines form management, with additional tools like Recharts and React Hot Toasts enhancing functionality. The project is hosted on Netlify, supporting CI/CD (continuous integration and continuous delivery/deployment) for seamless deployment.

Fast React Pizza Co.

<https://github.com/ManojMaheshPatil/Fast-React-Pizza>

- Fast React Pizza Co., a professionally crafted website offering an extensive pizza menu selection. The project used Advanced React, Redux, and Tailwind CSS to build a seamless ordering experience.

MyBlog

github.com/ManojMaheshPatil/blog-api-v1

- Developed a complete API for a blog with all the CRUD operations. Implemented all the backend features required for a blog to work. Used NodeJS as the programming language.

EDUCATION

Bachelor of Technology

PES Univesity • Bangalore • 2022 • 8.4

CERTIFICATIONS

The Ultimate React Course - React, Redux & More

Udemy • 2024

Master Node JS by building a real-world RESTful API

Udemy • 2023

Beginner Full Stack Web Development: HTML, CSS, React & Node

Udemy • 2022
